R/S Tech-Prob Solutions, LLC

Founder and President

Date: June 9, 2017

Place: University of Miami, Miami, FL

Time: 12-1pm

Abstract: In everybody's life, sooner or later, a thought comes to be your own boss. There are lots of advantages and challenges come with being a boss. We are all scientists, so our vision is to help mankind, may be with producing effective drugs, providing services to companies who are in bio-tech or pharmaceutical industries or provide them with the instruments that would help them in their research.

In my presentation I will discuss how and why I made a decision to start a contract analytical services company and what are the challenges and road blocks came along the way and how I overcame the challenges.
